Alex Moore: We would appreciate your french lists. OM LL has a coputor list which he has not updated for a while. We have noted that you say SON279-13793 is Press, Warsaw and that SPMH means special news broadcast.

Sorry, but we have not had the time to update the Guide. We have made preparations for a data list. Hope to get the time to finish it soon.

AAC&R Guantanamo Bay is at the moment probably not using a voice-mirror. I should think they are on a 24 hour service and therefore the voice-mirror is unnessecary. Referring to your question about CFARS I can inform you that they call each other using callsigns. We have the different addresses - see copy of old FFTP. We have lists of many of the US Mars stations, so if you hear one we will probably be able to supply you with the address.

Bill Matthews: You write: "In a recent broadcast over Radio Korea, Seoul, it was announced that as of April 1st, telecommunications were established between Korea and Poland and between Korea and Czechoslovakia. No indications were given if the links are on point-to-point radio or satellite. According to the announcement, this leaves only China and Albania among the "non-hostile communist countries" with which Korea does not have telecommunications."

Peter Sinke: Your comment that the addresses of new stations in the QSL section should be published in the bulletin is ok. The problem is that most members never send them to us. Another thing is that we have put some addresses in a little pile here awaiting the new Guide, of the answer to Alex above. Thank you very much for all your articles and lists, they are most wellcome. No problems about german articles. OM CRJ will have to translate them if you donot feel like doing it yourself, which would be much appreciated though. We have noted you visited Deutsche Welle and was informed that they are no longer transmitting to Kigali from Bonames, but are now using the transmitters in Bockhaken.

DEADLINE: ³⁰ 15th of JULY 1981. Pse send in a contribution
